Syskit

The governance layer for your Microsoft 365 environment

Syskit Point keeps your Microsoft 365 environment under control – secured, cost-optimized, and AI-ready.

CHALLENGES · DOING NOTHING HAS A PRICE

Struggles every IT team knows too well

Internal tools, PowerShell scripts, and manual effort don't scale, and the longer you wait, the harder this gets to fix.

No real M365 control

- Too many tools, no single truth
- Sprawl is growing and IT is stretched

IF IGNORED

Unmanageable sprawl, IT team burnout

Oversharing

- Data leakage and oversharing
- No clear view of who has access to what

IF IGNORED

Security incidents, failed audit

Money is leaking

- High storage costs and bloat
- No license usage insights for renewals

IF IGNORED

Storage hitting the limit

AI is amplifying every risk

- Stale content = untrusted AI output
- Agent sprawl

IF IGNORED

AI exposing sensitive data

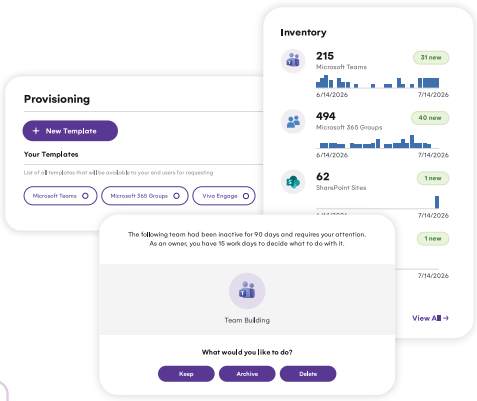
THE SOLUTION

Control, secure, optimize, and enable safe AI in your M365

Gain visibility & control

Run continuous M365 governance from a single interface, gain full visibility, and keep the environment clean.

- Gain **centralized M365 visibility** across Teams, Groups, OneDrive, SharePoint, Power Platform, users, and AI agents & assistants.
- Manage the **entire workspace lifecycle**, from provisioning to archiving or deletion.
- **Automate governance** with policies, automated cleanups, and reviews **delegated to owners**, so it runs on its own.

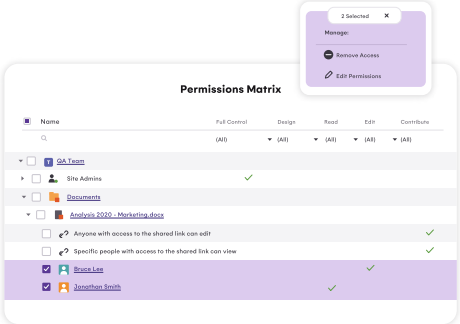


STADA | **30%+** reduction in admin workload

Stay secure & compliant

Prevent data leakage, oversharing, and breaches. Stay compliant and pass audits without a last-minute scramble.

- **Take control of permissions** – see exactly who has access to what and stop oversharing.
- Stay audit-ready with automated **security and compliance checks, alerts, and reporting.**
- **Delegate reviews** to workspace owners so risks are addressed before they become problems.



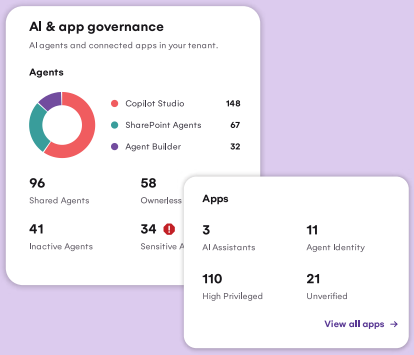
LOTUS | **40%** fewer compliance-related issues

AI READINESS

Enable safe AI adoption

Govern the environment AI runs on – control what AI can surface and track every AI agent and assistant accessing your M365.

- See, track, and govern **AI agents and assistants** and their access and activity, so nothing runs undetected.
- See **what AI can access** to safeguard sensitive data.
- Get **better AI response quality** with accurate, up-to-date content.

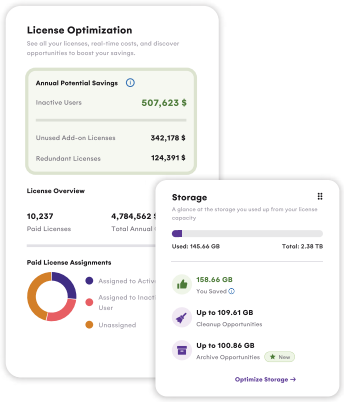


redgate | **2,000** expired sharing links removed, enabling safer AI adoption

Optimize M365 cost

Reduce unnecessary storage and licensing spend – no manual effort required, with ROI you can see in minutes.

- Reduce **storage costs** instantly with automated cleanup, archiving of inactive sites and files, and alerting.
- Detect and remove **redundant licenses**, improve their usage, and make confident renewal decisions.



ovativegroup | Woodside Homes | **$24K** storage costs saved in under 60 minutes | **35%** of all company licenses optimized

Simple to start, fast to adopt, easy to scale

01

Deploy in minutes

One platform, no complex setup, and no additional tools. **Self-hosted option available.**

02

See value fast

Quick onboarding and easy adoption across teams – no long training cycles required.

03

Always-on governance

Automated policies and continuous delegated reviews running on their own.

04

Scale without complexity

Supports your M365 growth without adding headcount or losing control.

ABOUT

Why Syskit Point

Syskit Point is the governance layer for Microsoft 365 – designed to complement Microsoft tools to keep large and complex environments under control, secured, cost-optimized, and AI-ready.

16+ years of M365 expertise

3,800+ customers in 70+ countries

5.5M+ active users

3M+ permissions removed annually
