

We have prepared this simple guide to help you get a better understanding of our products, features and licensing options. Find the best combination for your business. If you have any questions, contact us sales@syskit.com

SPDocKit is every SharePoint administrator's and consultant's must-have tool, offering a multifunctional administration experience. Generate SharePoint farm documentation, explore and validate configuration according to Best practices. Check structure, track the most important analytics metrics, audit changes and how your farm is being used to enforce governance policies and keep your farm secure.

Licensing

Farm Licensing – for **in-house SharePoint admins** working on **on-premises farms**

- > Internal use for a company's farms
- > Licensed per farm (workstation license included and additional non-production licenses are available upon request)
- > Annual subscription

Consultant Licensing – for **consultants who work for clients** – **unlimited projects**

- > External use – for working with clients on different projects
- > Licensed per consultant (single user)
- > Annual subscription
