

Case Study

Comtrade Group

How Comtrade Group saved time by using
SPDockKit to automate repetitive tasks

About the Company

Comtrade Group Case Study

Comtrade Group is southeast Europe's leading IT company, with over 1,500 employees in 11 countries. The company specializes in software solutions, system integration, and hardware distribution.

Challenge: Effectively Manage Users

Comtrade Group Case Study

Comtrade **has been using SharePoint** since version 2003. The company currently has several internal SharePoint portals and a few external portals for external collaborators. The internal portal infrastructure has one test farm and one production farm.

Managing users and their permissions has an important role in Comtrade's daily operations. To do so accurately, one must put in a lot of time and manual effort because **SharePoint does not provide an efficient solution** on its own.

Solution: SPDocKit SharePoint Tool

Comtrade Group Case Study

Before the Comtrade team learned about SPDocKit, they tried other solutions. However, they were not satisfied with any of them, and they mainly used custom PowerShell scripts to perform the necessary tasks.

Then they tested **SPDocKit**. It has helped them with their daily tasks and routines like:

- farm comparison,
- tracking changes,
- managing permissions.

Most importantly, it **gathered all the user data** they needed.

*"SPDockKit is easy to use,
and it gives me a great
overview of the
SharePoint environment,
permissions, and farm
health."*

*— Erik Žunec, SharePoint Administrator,
Comtrade Group*

Results: More Time for Strategizing

Comtrade Group Case Study

The biggest plus Erik experienced was the amount of time he saved. What previously took him hours to do now took minutes.

In addition, his workload decreased, leaving him with more time to strategize and plan for the upcoming migration.

"There is no need to have ten different tools that each do small pieces of work. SPDockKit does it all without a hitch."

*– Erik Žunec, SharePoint Administrator,
Comtrade Group*

Results: Easier Farm Migration

Comtrade Group Case Study

For a migration to run smoothly, administrators must know the exact size and structure of the content in the farm. [SPDocKit proved to be helpful](#) with that task, too.

Before and after the migration, Erik [generated documentation](#) for the entire farm, which [made the process easier, faster, and more accurate.](#)

"Generating the farm documentation helped me tremendously. It gave me a great overview of all the farm assets and its infrastructure."

*– Erik Žunec, SharePoint Administrator,
Comtrade Group*

The Ultimate SharePoint Admin Tool

SPDockKit is every SharePoint administrator's must-have tool, offering a multifunctional administration experience- use it for **documenting, reporting and managing SharePoint farm.**

Benefits of using SPDockKit

Save time by automating routine administrators' tasks.

Increase data security and enforce governance policies.

Audit configuration and enhance SharePoint farm performance.

What does SPDockKit allow you to do?

- > Create professional-looking SharePoint documentation in just a few clicks
- > Explore, manage, and report on SharePoint permissions
- > Validate farm configuration according to the latest SharePoint best practices
- > Take snapshots to compare farms and track changes in farm configuration
- > Establish your own particular SharePoint rules and run custom queries to enforce governance policies
