

SysKit Security Manager

SysKit Security Manager is an all-in-one **Office 365 security tool**.

It helps you **audit, manage, and report** on security, users, and permissions in SharePoint sites, Office 365 Groups, OneDrive and Microsoft Teams.

Make your Office 365 safe from all security threats. Give it a try with a **30-day free trial**.

**EASY TO INSTALL
SIMPLE TO USE**

BENEFITS OF SYSKIT SECURITY MANAGER

Save time - manage users and permissions in bulk

Improve visibility and avoid malicious behavior - track all users' and admins' activities

Boost Office 365 security - control external sharing and access requests

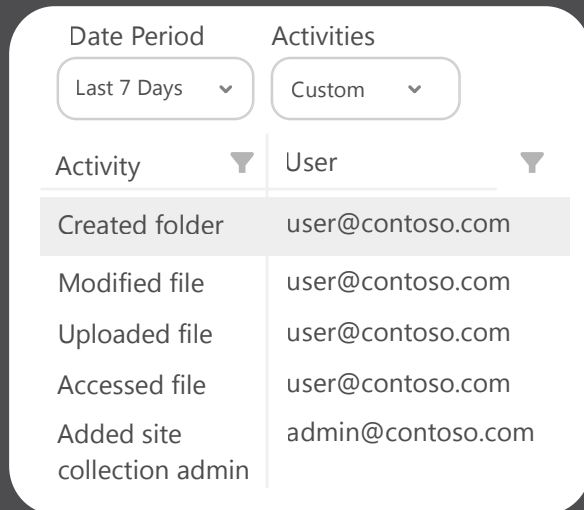

Keep your management in the loop - schedule and send security reports

START WITH A **30-DAY** FREE TRIAL

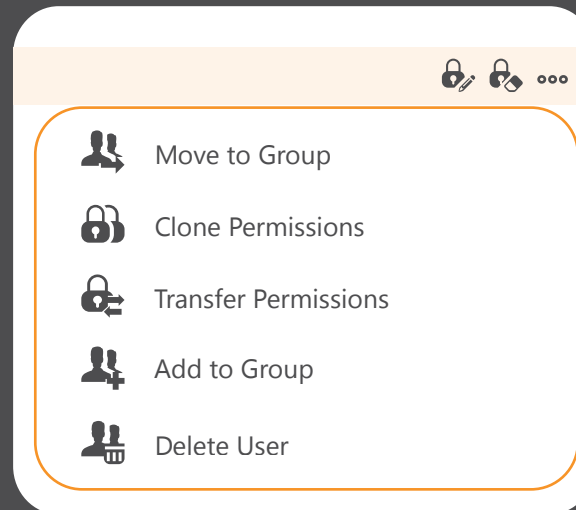

PRODUCT FEATURES

Contextual Office 365 Auditing

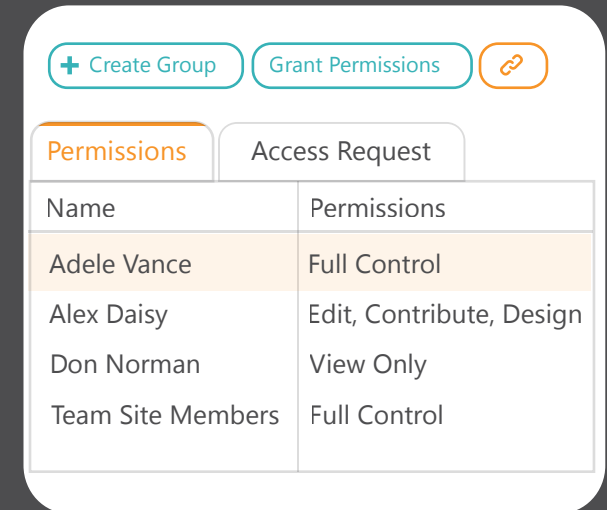

- › Track all users' and admins' activities across Office 365 – every content and permission change or login attempt.
- › Detect unauthorized changes, track suspicious external sharing, and avoid possible security breaches.

Office 365 Users & Permissions Management

- › User onboarding & offboarding was never easier! Select multiple users and manage their permissions in bulk - grant, copy, transfer or delete!
- › Boost security in no time – move multiple users to groups and restore broken permissions on multiple items!

Office 365 Security Reporting

- › Find all permissions in a tenant. From a user perspective – check all places where a user has permissions. From an item perspective – check all users that have permissions on that item.
- › Schedule and generate easy to read reports and keep everybody in the loop!

ANNUAL SUBSCRIPTION

Starting at
\$2499
per Admin*

- ✓ A license is required for each user running the app
- ✓ *Licensed per SharePoint admin, consultant or any business user managing permissions.
- ✓ Valid for one year with support and product upgrades included.

//

I don't consider any Office 365 Admin complete without a copy of SysKit Security Manager. It's like trying to drive a car blindfolded.

//

Todd Klindt, Microsoft MVP

SysKit is a software development company based in Zagreb, Croatia. The company was founded in 2009 and is devoted to creating innovative enterprise software solutions for SharePoint, Office 365, Windows Servers, Remote Desktop Services, and Citrix environments. SysKit has developed many quality software products, such as SPDocKit, SysKit Monitor, SysKit Insights and SysKit Security Manager.
